NETWORKCOLLECTION

Network supports and facilitates teamwork and collaboration in numerous workplace settings. Whether working across a table from one another or meeting in a more casual and relaxed manner, Network provides the seating and table solutions to create the perfect environment.

In addition to offering 1, 2 and 3-seaters, Network offers SKU's with partial backs of various widths to allow for the creation of island and peninsula layouts. Additionally, arm units are available to divide the space and provide a resting place for forearms. The arm units may equipped with power modules to allow recharging of hand held and laptop devices. Modular components may be specified as ganged or free standing.

Designed by Chris Carter.

Privacy panels are available to create private conversation areas within large spaces. The panels are fully upholstered and are large enough to stand freely without connection although the panels may be ganged if desired. The height of the panels allows shelves of various widths to be hung at bar height.
